

Software Development Engineer

MATTHEW MUNOZ-RAMIREZ

mrmatthew5293@gmail.com | (909) 327-8275 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Proficient Technical Skills

Programming Languages: C#, Python, C++, Java, JavaScript (ES6+), TypeScript, Dart, SQL, PHP, HTML, CSS

Frameworks and Libraries: React, Angular, Node.js, Flask, .NET, Bootstrap, Spring Boot, Flutter, Selenium

Tools and Platforms: Docker, AWS, Azure, Google Cloud Platform, Firebase, Firestore, Firebase Cloud Functions, Firebase Authentication, MongoDB, GitHub, JIRA, Postman, Auth0, REST APIs, EasyPost, Zebra Browser Print

Development Practices: Agile Methodology, Full-Stack Development, API Development, Third-Party API Integration, Unit Testing, Test Automation, Quality Assurance, Microservices, Debugging, Code Reviews, CI/CD, Responsive UI Development

Operations & Technical Support: Hardware Troubleshooting, Device Provisioning, Tech Support, Workflow Automation, Warehouse Operations Support, End-User Training, Production Issue Resolution, Shipment & Fulfillment Workflow Support

Professional Experience

HydroJug | Junior Node.js Developer

Ogden, Utah

Onsite-Fulltime

Jan 2025 - Present

- Reduced manual processing time by building workflow automation tools using React and Node.js.
- Improved application reliability by identifying and resolving critical production issues in a fast-paced environment.
- Streamlined user workflows through intuitive UI improvements and responsive frontend development.
- Increased operational efficiency by integrating third-party APIs and automating backend data processing tasks.

Insur-Fi | Lead Developer

Atlanta, Georgia

Remote-Contract

July 2024 - September 2024

- Led a team to design and deploy a Flask API and .NET library, improving data management efficiency.
- Conducted comprehensive code reviews to uphold quality standards and ensure streamlined logical flow.
- Detailed documentation for data mapping processes, reducing processing time and enhancing operational clarity.

AdvancedMD | Software Engineer Intern

Atlanta, Georgia

Hybrid-Internship

June 2024 - September 2024

- Working in an agile environment using JIRA for project management to maintain workflow.
- Automated manual testing processes using .NET 8, enhancing testing efficiency.
- Developed Google Lighthouse reports, driving an improvement in accessibility metrics for the UX team.
- Maintained robust API and UI tests, utilizing custom NuGet packages to enhance system reliability.

Insur-Fi | Associate Software Developer Intern

Atlanta, Georgia

Remote-Internship

March 2024 - June 2024

- Engineered a Flask API with Okta Auth0 authentication, accelerating customer data access.
- Integrated FileZilla for efficient file transfers on Linode servers, reducing manual operations.
- Revamped testing environments, optimizing workflows for database and API development.

Pure Storage | Technical Service Engineer Intern

Lehi, Utah

Hybrid-Internship

January 2024 - March 2024

- Utilized CRM software tools like ServiceNow to resolve customer cases and apply maintenance fixes efficiently.
- Conducted system stagings and health checks on FlashArrays and FlashBlades, reducing downtime.
- Enhanced operational efficiency through proactive customer communication strategies.

Education & Achievements

Neumont College of Computer Science

Salt Lake City, Utah

Bachelor of Science in Computer Science

October 2021 - August 2024

- **GPA: 3.96** of 4.00
- Vice President of the [NeuRobotics](#) Club.
- [Student Government](#) Vice-Chairman.
- Completed degree in an accelerated environment.
- 1st place at [FReX](#) 2022 General Projects.
- Partnered with [Make Salt Lake](#) for Stack Overspin
